

# TRENDS in Cognitive Sciences

August 2002

Vol. 6, No. 8

pp. 317–357

<http://tics.trends.com>

Cover: When can we trust what subjects in experiments say about what they experience? The issues of self-report and introspection more generally are examined in two of this month's articles: Anthony Jack and Andreas Roepstorff reconsider the role of introspection in experimental cognitive psychology on page 333, and Jonathan Schooler examines the distinctions between consciousness (experience) and meta-consciousness (appraisal of that experience) on page 339. Design by Geraldine Woods.

## Forthcoming articles

### When a good fit can be bad

Mark Pitt and In Jae Myung

### Neural transmission and the flash-lag effect

Romi Nijhawan

### New visions of the aging mind and brain

Patricia Reuter-Lorenz

### Human spatial representation: insights from animals

Ranxiao Wang and Elizabeth Spelke

## Opinion

### 333 Introspection and cognitive brain mapping: from stimulus–response to script–report

Anthony I. Jack and  
Andreas Roepstorff

### 339 Re-representing consciousness: dissociations between experience and meta-consciousness

Jonathan W. Schooler

## Review

### 345 What determines visual cue reliability

Robert A. Jacobs

### 350 The brain circuitry of syntactic comprehension

Edith Kaan and Tamara Y. Swaab

## Research Update

### Research News

#### 317 How do you feel?

John S. Morris

#### 319 Where was that? – human auditory spatial processing

Gregg H. Recanzone

#### 321 Language and spatial frames of reference in mind and brain

C.R. Gallistel

#### 323 Causality and the perception of time

David M. Eagleman and Alex O. Holcombe

## Meeting Report

#### 326 Contrasting conceptions of human infants

Sandra E. Trehub

#### 327 Making connections about brain connectivity

James V. Stone and Rolf Kötter

#### 328 Explaining the ineffable

Sebastian Kokelaar and Matthew Lavy

## News & Comment

### 330 Journal Club

Receptive-field plasticity in human visual cortex

All spaced out over memory and LTP

### 331 In Brief

## Forum

### Book Review

#### 357 Comparative Vertebrate Lateralization (by Lesley J. Rogers and Richard J. Andrew)

Luca Tommasi
